THEORETICAL AND MATHEMATICAL PHYSICS

Volumes 46-49, 1981

(A translation of Teoreticheskaya i Matematicheskaya Fizika)

Volume 46, Number 1 January, 1981

	Engl./Russ.	
Infrared Divergences of Green's Functions and Renormalization in Massless Theories. II – S. A. Anikin, O. I. Zav'yalov, and N. I. Karchev	1	3
The Singularities of Feynman Diagrams in the Coordinate Space and the α Representation – V. A. Smirnov	17	27
Locality of the Weak Interaction of a Lepton Pair and Heavy Lepton Decays – M. P. Rekalo	21	33
Automorphic Systems of Scalar Fields – S. A. Vladimirov	28	45
Formulation of the Relativistic Mechanics of Systems of Interacting Particles – N. P. Klepikov and A. N. Shatnii	32	50
Dimensional Regularization and Exact Solution in an Equation of the Type of the Radial Schrödinger Equation – V. A. Gribov	42	64
Theory of Turbulent Transport on the Basis of Nonequilibrium Statistical Thermodynamics – D. N. Zubarev	47	71
Particle-Like Excitations in Systems Described by the Hubbard Model Without the Chirality Condition – V. K. Fedyanin	57	86
Derivation of the Equations of Superconductivity in an Electron–Ion Model of a Metal – G. M. Vujičić, Z. K. Petru, and N. M. Plakida	60	91
Kinetic Equations for Quantum Subsystems with Finite Number of Degrees of Freedom in a Condensed Medium – É. G. Petrov	65	99
Critical-Point Singularities. I. The Critical-Point Condition and the Susceptibility – V. N. Plechko	73	111
Violation of the Principle of Minimality of the Free Energy in the Self-Consistent Field Approximation for Some Models of Ferroelectrics – M.A. Osipov and A.S. Shumovskii	83	125
Perturbation Theory and the Exchange Interaction in the One-Dimensional Hubbard Model – V. M. Zharkov	88	132
Solitons in the Theory of the Superconducting Phase in Compounds of Rare Earth Metals – M. A. Savchenko and A. V. Stefanovich	92	139

Volume 46, Number 2 February, 1981

Conditional Expectations on von Neumann Algebras and the Causal Independence of Quantized Fields – K. Yu. Dadashyan and S. S. Horujy	97	147
Simple Method of Calculating the Critical Indices in the 1/n Expansion – A. N. Vasil'ev, Yu. M. Pis'mak, and Yu. R. Khonkonen	104	157
Supersymmetric cos Φ_2 Model and the Inverse Scattering Technique – P. P. Kulish and S. A. Tsyplyaev	114	172
Multiplicative Functionals and Gauge Fields – O. M. Khudaverdyan and A. S. Shvarts	124	187
Infrared and Ultraviolet Divergences of the Coefficient Functions of Feynman Diagrams as Tempered Distributions. II – V. A. Smirnov	132	199
Description of the Widths and Spectra of the Bound States of Two Relativistic Fermions – A. V. Sidorov and N. B. Skachkov	141	213
Delbourgo Representation and the Gluon Propagator in the Light-Like ($n^2 = 0$) Gauge – A. A. Khelashvili	149	225
Critical Indices for Models with Long-Range Interaction – M. D. Missarov	153	232
Low-Frequency Asymptotic Behavior of the Green's Functions of Degenerate Bose Systems (Kinetic Approximation) – V. P. Skrypnik and V. S. Shchelokov	160	242
Higher Approximations in the Theory of the Average Hamiltonian – L. L. Buishvili, E. B. Volzhan, and M. G. Menabde	166	251
Statistical Theory of Nonequilibrium Fluctuations with Large Correlation Range – S. V. Peletminskii, S. S. Plokhov, and V. I. Prikhod'ko	174	263
Electrical Conductivity of a System of Localized and Delocalized Electrons – G. Röpke	184	279

Volume 46, Number 3 March, 1981

Representation of Free Solutions for Schrödinger Equations with Strongly Singular Concentrated Potentials – Yu. M. Shirokov (deceased)	191	291
Dispersion Sum Rule for the Energy–Momentum Tensor – V. E. Troitskii, I. S. Tsirova, and Yu. M. Shirokov (deceased)	197	300
Associative Algebra of Generalized Functions Closed with Respect to Differentiation and Integration – G. K. Tolokonnikov and Yu. M. Shirokov (deceased)	200	305
Quantum Delta-Like Potential Acting in the P State – I. S. Tsirova and Yu. M. Shirokov (deceased)	203	310
Interaction of a Charged Particle with an External Electromagnetic Field in the Presence of a Strongly Singular Potential – S. V. Talalov and Yu. M. Shirokov (deceased)	207	316
Energy Levels of an Oscillator with Singular Concentrated Potential – O. G. Goryaga and Yu. M. Shirokov (deceased)	210	321
Two-Dimensional Field Theory with Several Condensed Phases – N. E. Bogdanova and V. N. Popov	212	325
On Discrete Subgroups of the Three-Dimensional Rotation Group – R. M. Muradyan	219	335
A Method of Summing Nonalternating Asymptotic Series – D. I. Kazakov	227	348
Theory of Wightman Functions in the Thirring Model – D. Ts. Stoyanov and L. K. Khadzhivanov	236	361
Linear Pseudopotentials and Conservation Laws for the Landau–Lifshits Equation Describing the Nonlinear Dynamics of a Ferromagnet with Uniaxial Anisotropy – A. E. Borovik and V. N. Robuk	242	371
Geometrical Structure and Bäcklund Transformations of Nonlinear Evolution Equations Possessing a Lax Representation – A. K. Prikarpatskii	249	382
Conformal Invariance of Scalar Bosons in Weinberg–Salam Type Theories – V. M. Nikolaenko, K. P. Stanyukovich, and G. N. Shikin	256	394
H Theorem for a Homogeneous Gas when Allowance Is Made for Various Approximations in the Density Parameter – R. L. Stratonovich	262	402
Investigation of Generalized Liouville Equation – G. A. Rudykh	270	414
Green's Function of a Uniaxial Ferromagnet with Single-Ion Anisotropy and Arbitrary Spin in the Canted Phase – A. A. Kazakov	278	426

Volume 47, Number 1 April, 1981

Do Extended Bodies Move Along Geodesics of Riemannian Space-Time? – V. I. Denisov, A. A. Logunov, and M. A. Mestvirishvili	281	3
On a Family of Commutative Wick Symbols – A. A. Tsvetkov	302	38
Simultaneous Solution of the Equations of the Gravitational Field and a Field of Nuclear Forces for a Point Source – V. M. Razorenov and M. F. Skirokov	310	50
Theory of the Strong Coupling of a Particle and a Quantized Field with Internal Degrees of Freedom – S. T. Zavtrak, L. I. Komarov, and I. D. Feranchuk	313	55
Kowalewski Basis for the Hydrogen Atom – I. V. Komarov	320	67
Analytic Solution to the Problem of Three-Particle Collisions in a Model with Eikonal Hamiltonian – V. E. Kuz'michev and V. F. Kharchenko	324	73
Kinetic Theory of the Broadening of Spectral Lines in Plasmas – Yu. L. Klimontovich and S. A. Sukhin	334	89
Ground-State Wave Function of a One-Dimensional Weakly Nonideal Lattice Fermi Gas – V. Ya. Krivnov and A. A. Ovchinnikov	339	96
Critical-Point Singularities. II. The Ordered Phase – V. N. Plechko	346	106
Solution of the Quantum BBGKY Hierarchy for a Crystal – I. P. Bazarov and P. N. Nikolaev	356	120
Quantum Theory of Channeling. Transport Coefficients and Parameters of the Equilibrium Distribution of Channeled Particles in the Quasiclassical Case – Yu. A. Kashlev	359	125
Singularities of Feynman Amplitudes in the Momentum Space – V. A. Smirnov	369	140

Volume 47, Number 2 May, 1981

Integer Charge Quarks and Spontaneously Broken Color Symmetry – A. Yu. Ignat'ev, V.A. Kuz'min, V. A. Matveev, A. N. Tavkhelidze, K. G. Chetyrkin, and M. E. Shaposhnikov	373	147
Asymptotic Estimates in Perturbation Theory and the Structure of Functional Integrals – M. Z. Iofa and D. Yu. Kuznetsov	383	163

WKB Approximation for Tolman's Problem (Collapsing Dust) – V. K. Mal'tsev	392	177
Legendre Transformations and Equations for Green's Functions – V. E. Rochev	397	184
Nonlinear Realization of Einsteinian Supergravity – A. A. Kapustnikov	406	198
Integrals Over a Grassmann Algebra – L. V. Prokhorov	413	210
General Solutions of the Two-Dimensional System of Volterra Equations which Realize the Bäcklund Transformation for the Toda Lattice – A. N. Leznov, M. V. Savel'ev, and V. G. Smirnov	417	216
Relativistically Invariant Quasiclassical Limits of Integrable Two-Dimensional Quantum Models – I. V. Cherednik	422	225
First Integrals of the One-Dimensional Quantum Ising Model with Transverse Magnetic Field – V. V. Anshelevich and E. V. Gusev	426	230
Method of Orthogonalized Distorted Waves in the Theory of Three-Particle Scattering – V. I. Kukulin and V. N. Pomerantsev	434	243
Asymptotic Method in the Theory of the Passage of Fast Charged Particles Through Matter – Yu. N. Barabanenkov	442	254
Asymptotic Behavior of the Spectrum of an Anharmonic Oscillator – L. A. Sakhnovich	449	266
Kinetics of Systems in Strong Alternating Fields – V. P. Seminozhenko and A. A. Yatsenko	457	277

Volume 47, Number 3 June, 1981

1/n Expansion: Calculation of the Exponents η and ν in the Order $1/n^2$ for Arbitrary Number of Dimensions – A. N. Vasil'ev, Yu. M. Pis'mak, and Yu. R. Khonkonen	465	291
Feynman Integral for Exponential Interaction in Four-Dimensional Space-Time. I – É. P. Osipov	475	307
Quantization of Field Theory in the Sector with Zero Charges – A. E. Pukhov	481	315
Almost Periodic Solutions of a Modified Nonlinear Schrödinger Equation – A. K. Prikarpatskii	487	323
Propagator in the Nonlocal Bloch–Nordsieck Model – A. V. Kiselev and A. Ya. Rodionov.	494	333
Wave Equations for Massless Fields – Yu. P. Stepanovskii	501	343
Exact Statistical Relations for Susceptibilities and Conductivities – Nguyen Tang	507	352
Generating Functional Method and Gibbs Random Fields on Countable Sets – V. V. Krivolapova and G. I. Nazin	514	362
Thermal Effects in the Polaron Model – E. A. Kochetov and M. A. Smondyrev	524	375
Distribution of Dimers on a Plane Square Lattice in the Percus–Yevick Approximation – E. V. Aksenenko and Yu. V. Shulepov	532	387
Cherenkov Radiation of Tachyons – M. I. Faingol'd	538	395
Asymptotic Behavior of Green's Functions and Correlation Functions in the Statistical Theory of Nonequilibrium Processes – V. G. Morozov	547	407
Multicomponent Boundary-Value Problem of Linear Conjugation – O. V. Meunargiya	555	419
Elementary Excitations in the Anderson–Hubbard Model. I. Bose Excitations in Paramagnetic Media – A. V. Vedyaev and V. A. Ivanov	560	425

Volume 48, Number 1 July, 1981

Theory of Group Representations and Integration of Nonlinear Dynamical Systems – A. N. Leznov, M. V. Savel'ev, and V. G. Smirnov	565	3
Integrable Two-Dimensional Lorentz-Invariant Nonlinear Model of a Complex Scalar Field (Complex Sine–Gordon II) – B. S. Getmanov	572	13
Commutation Relations of the Transition Matrix in the Classical and Quantum Inverse Scattering Methods (Local Case) – S. A. Tsyplyaev	580	24
On Nonlocal Conserved Currents in Supersymmetric Generalized Nonlinear Sigma Models – R. P. Zaikov	587	34
Behavior of the Mass Operator in a Superstrong Magnetic Field: Summation of the Perturbation Theory Diagrams – Yu. M. Loskutov and V. V. Skobelev	594	44
Weyl Quantization on Compact Abelian Groups and the Quantum Mechanics of Almost Periodic Systems – M. A. Antonets and I. A. Shereshevskii	597	49
Peierls–Fröhlich Problem and Potentials with Finite Number of Gaps. II – E. D. Belokolos	604	60
Inverse Problem of Reconstructing a Confining Potential for the Radial Schrödinger Equation – M. N. Adamyan	611	70
Reduction of Quasipotential Equations to Sturm–Liouville Problems and the Comparison Equation Method – V. Sh. Gogokhiya	617	80

Construction of a Kinetic Equation for a Quantum Dynamical System Interacting with a Phonon Field by the Method of Ordered Operators – G. O. Balabanyan 624 89
Derivation of the Equations of the Theory of Nonisothermal Nucleation — A. G. Bashkirov and S. P. Fisenko 636 106
Isolated and Isothermal Susceptibilities of a Pseudospin–Phonon System – V. L. Aksenov and J. Schreiber 640 112
Solution of Inhomogeneous Schrödinger Equation with Model Pseudopotential – E. O. Voronkov and V. V. Rossikhin 647 121
Density–Density Correlation Function of a System of Molecular Excitons – A. Yu. Gaevskii, I. G. Kaplan, and M. A. Ruvinskii 653 129
Divergence of the Burnett Coefficients in the Three-Dimensional Hydrodynamics of Hard Spheres. I. Linear Approximation – N. G. Inozemtseva and B. I. Sadovnikov 658 137

Volume 48, Number 2 August, 1981

Calculation of Double Logarithmic Asymptotics of On-Shell Vertex Functions – V. V. Belokurov and N. I. Usyukina 663 147
Feynman Integral for Exponential Interaction in Four-Dimensional Space-Time. II – É. P. Osipov 669 156
Absence of Anomalous Counterterms in the First Order in the Coupling Constant of the First Variational Derivative of the Quantum Expectation Value of the P Exponential – A. G. Chernikov 677 168
Supersymmetric Constraints and Gauge Fields on Superspace – V. D. Gershun and V. I. Tkach 685 180
Two-Particle Equations for Fermions in Models with Trilinear Interaction – M. L. Nekrasov and V. E. Rochev 689 187
Interaction of Point Sources with a Higgs Field in One-Dimensional Space – O. Sh. Rasizade 696 197
Relativistic Centers of Mass and Clustering – M. Datta and N. P. Klepikov 704 210
Weak Interactions and Dispersion Relations – V. I. Lazur and I. V. Khimich 708 216
Covariant Generalization of Noether's Theorems for Fields with Spin $\frac{1}{2}$ – B. A. Levitskii and Yu. A. Yappa 715 227
Hierarchy of BBGKY Equations for One-Dimensional Systems of Particles with Hard Core – A. K. Vidybida 721 236
Cluster Effects in Multicomponent Alloys – Yu. M. Ivanchenko, A. I. Kozinskaya, and A. A. Lisyanskii 730 250
A Theorem about States on Quantum Logics. II – M. S. Matveichuk 737 261
On the Population Numbers of Pair States in a System of Excitons – A. V. Luzanov and M. M. Mestechkin 740 266

Volume 48, Number 3 September, 1981

New Mechanism of Energy Release in Astrophysical Objects – V. I. Denisov and A. A. Logunov 745 275
Infrared Asymptotic Behavior of the Gluon Propagator – A. N. Vasil'ev, Yu. M. Pis'mak, and Yu. R. Khonkonen 750 284
Non-Fock Linear Boson Systems and Their Applications in Two-Dimensional Models – A. I. Oksak 759 297
Trace Formulas for the Quantum Nonlinear Schrödinger Equation – A. G. Izergin, V. E. Korepin, and F. A. Smirnov 773 319
Infrared Asymptotics of Power Type for the Gluon Propagator in the Axial Gauge – A. I. Alekseev 776 324
Classical Particle with Spin and Clifford Algebra – A. L. Glebov 786 340
Global Structure of the General Solution of the Chew–Low Equations – V. P. Gerdt 790 346
Quantum Hydrodynamics of Self-Gravitating Matter – M. B. Birman, D. N. Zubarev, and S. A. Smolyanskii 796 356
Generalized Fokker–Planck Equation for Quantum Systems – V. G. Morozov 807 373
Quasistationary Quasi-Energy States and Convergence of Perturbation Series in a Monochromatic Field – N. L. Manakov and A. G. Fainshtein 815 385
Markov Methods of Analysis of Stochastic Quantum Dynamics of Quasiclassical Open Systems – B. A. Grishanin 822 396

	Engl./Russ.	
Annihilation of Excitons in Quasi-One-Dimensional Crystals – Yu. B. Gaididei	831	410
Statistical Theory of Crystallization in a System of Hard Spheres – V. N. Ryzhov and E. E. Tareeva	835	416
New Theorem on the Asymptotic Equality of Differential Cross Sections – S. Yu. Medvedev	840	424
The Exciton Spectrum Problem in Strongly Anisotropic Semiconductors – K. K. Danilevich-Tovstyuk and B. A. Lukiyanets	843	428

Volume 49, Number 1 October, 1981

Unitarity Bound for Three-Particle Scattering Amplitude – A. A. Arkhipov and V. I. Savrin	847	3
Generalized Effective Potential in Nonlinear Theories of Fourth Order – N. S. Ananikyan and G. K. Savvidi	862	26
Bifurcations and "Catastrophes" in the Higgs Model with External Sources – O. Sh. Rasizade	869	36
Quadratic Hamiltonians and Relativistic Quantum Mechanics: A Charged Scalar Particle in a Coulomb Field – A. V. Razumov, V. O. Solov'ev, and A. Yu. Taranov	877	48
Conditions of Existence and Stability of a Solution of Singular Kirkwood–Salsburg Equations. Parts I and II – K. S. Matviichuk	887	63
Phase Transitions in Gases with Generalized Charges Interacting Through a Logarithmic Law. I. d = 2, Isotropic Case – S. A. Bulgadaev	897	77
Covariant Perturbation Theory in Classical Electrodynamics – Yu. G. Pavlenko	908	92
Functional Integrals in Problems Involving the Kinetics of Electrons in a Strong Field – V. M. Fomin	915	102
Dynamical Stochasticity in Nonlinear Quantum Systems – D. L. Shepelyanskii	925	117
Kinetics of Relaxation Transitions Between Multilevel Quantum States – A. A. Demidenko and É. G. Petrov	928	122
Asymptotic Methods in the Theory of Linear Kinetic Equations – S. A. Reshetnyak, S. M. Kharchev, and L. A. Shelepin	934	131
Nonequilibrium Statistical Mechanics of Heterogeneous Systems. III. Brownian Motion of a Large Particle in an Inhomogeneous Fluid – A. G. Bashkirov	940	140

Volume 49, Number 2 November, 1981

Jost–Lehmann–Dyson Representation in the Spaces S'_a – B. I. Zav'yalov	945	147
Lattice R-Gauge Theories – Yu. M. Zinov'ev	951	156
Quantization of a Relativistic String – A. V. Razumov	957	164
On the Unique Solvability of the Cauchy Problem for the Equations of Motion of Discrete Analogs of Multidimensional Chiral Fields Taking Values on Compact Symmetric Spaces – B. I. Shubov	966	178
Equivalence Transformations for Systems of Equations of Scalar and Spinor Fields – S. A. Vladimirov and A. V. Konarev	974	190
Particle in a Self-Consistent Field. Some Exact Solutions – V. G. Budanov	979	198
Casimir Operators of Groups of Motions of Spaces of Constant Curvature – N. A. Gromov	987	210
A Method of Solving Infinite Systems of Equations for Two-Time Thermal Green's Functions – Yu. A. Tserkovnikov	993	219
Method of Functional Integration in the Theory of Spin Systems – I. A. Vakarchuk and Yu. K. Rudavskii	1002	234
Description of a Relativistic Electron in a Quantizing Magnetic Field. Transverse Transport Coefficients of an Electron Gas – A. D. Kaminker and D. G. Yakovlev	1012	248
Two-Dimensional Ice-Type Vertex Model with Two Types of Staggered Sites. I. The Free Energy and Polarization – R. Z. Bariev	1021	261
Dispersion and Damping of the Goldstone Mode in a Multicomponent Magnetic System – A. B. Zolotovitskii and V. P. Kalashnikov	1028	273
Theory of Bound States of Charged Particles in Resonance Media – É. A. Manykin, M. I. Ozhovan, and P. P. Poluéktov	1035	283

Volume 49, Number 3 December, 1981

Mass Dependences in Renormalization-Group Solutions – D. V. Shirkov 1039 291
Asymptotic Dynamics of a System of a Large Number of Particles Described by the Kolmogorov–Feller Equations – V. P. Belavkin, V. P. Maslov, and S. É. Tariverdiev .. 1043 298
Equations for Path Mean Values in Non-Abelian Gauge Theory – V. V. Bazhanov and A. P. Isaev . 1049 307
Effect of Three-Particle Forces in Scattering by Deuterons – A. A. Arkhipov 1057 320
Altarelli–Parisi Equations as Renormalization-Group Equations for the Coefficients of Nonlocal Expansion on the Light Cone – M. Bordag and D. Robaschik 1063 330
Investigation of Models of Spin Glass with Arbitrary Distributions of the Coupling Constants – A. N. Ermilov, A. N. Kireev, and A. M. Kurbatov 1071 344
Parametric Green's Functions in the Theory of Magnetization of Uniaxial Two-Sublattice Magnetic Crystals – A. A. Kazakov 1076 353
